ABOUT US

OPERATIONAL FOR OVER 40 YEARS

VYS was born from an Italian family holding based in Venice and trading for over 40 years, mainly supplying the mass market, gradually expanding its service to luxury hotels, private mansions, air travel and nautical branches. Following our success in nautical branch in 2017 we have chosen to start this brand in order to work directly with the superyachts.

Due to the fact that we were already providing many superyacht suppliers and other intermediaries we found it easy to enter this market and open a direct dialogue with management companies, yacht agents and yacht chefs on board. Beginning from the Adriatic region we rapidly expanded into Croatia by realizing a direct connection enabling us to serve the whole Croatian area up to Montenegro.

We are based in Venice where we have a large number of facilities including warehouses, wine cellars and food processing laboratories working with various products in order to prepare and package them according to our clients' needs. We are developing new branches in the areas where we are already working in addition to supplying platforms equipped with products stocks and a logistics department reporting only to us for the purpose of directly supplying those territories and beyond.

SURE ENOUGH IN 2021 SEASON VYS STRENGTHENED BY OPENING THE FOLLOWING NEW BRANCHES:

ROME: Central warehouse to serve the whole South of Italy and islands

PORTO ROTONDO: from there we manage the whole Sardinia region with a specially-made logistics department from sea and shore.

MARINA DI STABIA which is our headquarter for the Campania region with a logistics department from sea and shore.

In addition to the provisioning service, VYS offers the following services:

Diving and fishing equipment.

Safety equipment.

Spare parts engine room, covering, interior.

Technicians specialized in repair and replacement of wood, steel and fiberglass

Specialists of electrical installations

Specialists of refrigerators

Medicines

Bunker (cut rate diesel oil)

Fast reservations in the Marina di Stabia port

GENOA: from there we manage the whole Ligurian area up to Saint Tropez

BARCELONA: base camp to supply in Spain.

In all the countries where our companies are based we are used to acquire directly from national manufacturer and/or importers and we count as well on our logistics department including refrigerated shore and sea transport.

This allows us to provide an extremely efficient service at a highly competitive price. We offer not only a top quality product and a reliable service but also the highest level of customization which includes the product selection, the preparation and the packaging in order to satisfy the needs of even the most demanding client.

Developed for over 20 centuries between the Tiber and Chiana Valleys, from which this breed takes his name, the Chianina, is one of the largest and oldest beef species used for breeding. It is certified and guaranteed by the IGP brand to offer quality assurance to consumers. Chianina provides low-fat meat, with fat infiltrations between muscles that emphasize the flavour only in larger specimens of pure Chianina, male and female, aged between 12 and 24 months. Thanks to its specification, Chianina is considered one of the best breed in the world.

Court's White is a selection of high-quality cattle obtained from the cross between the best certified pure "Chianina", "Marchigiana" or "Podolica" breed bulls, with a score higher than 82 points, and Italian cows selected from the best herds. The result is meat with unique characteristics, with lively colour and a singularly tender and marbled grain, with an unmistakable flavour.

"Marango" is a cross between an Aberdeen Angus bull and a "Maremmana". These cattle are bred in Italy, first in the wild between Lazio's mountains and subsequently, moved to Piedmont, where they follow a meticulous diet designed to increase the Omega 3 level. This Singular feeding generates in the meat of the animal also an excellent level of marbling. It will turn out to be fatty thanks to Omega 3, but also very savoury and tender.

"Cinta Senese" pigs are strictly free-range bred, where the pigs can eat mainly acorns thanks to the presence of oaks and holm oaks, but also tubers, truffles, roots and wild herbs. Compared to other porks, his meat is much redder, juicier, tastier, and healthier thanks to its high level of unsaturated fatty acids such as Omega3 and Omega6 and Oleic acid. These characteristics make "Cinta Senese" one of the best breeds of pigs in the world.

FISH

Our strength in the fresh fish sector is in the continuous supply that takes place on average five times a week: Monday, Tuesday, Thursday and Saturday to be able to cover the whole week. Fished or bred arrivals from abroad take place on Thursday and Saturday.

We operate in the following markets:

Italy: Milan, Chioggia, Caorle, Ancona, Manfredonia and Sicily.

Abroad: France, Spain, Holland, United Kingdom, Norway, Greece and Croatia.

How do we go on:

In its laboratories, VYS processes all the fish according to the customer's needs. Since the product enters the company, we take action to process it, clean it, pack it and label it. Furthermore, if the customer requests the chilling at -30°, the necessary time is 8 hours with a capacity of 1000Kg of chillable product.

OUR EXCLUSIVE TUNA

The Ikijime technique is an original Japanese method that allows you to keep the original flavour of the fish meat intact and, above all, prevents the animal from suffering death. The Ikijime method is carried out through a small and rapid operation in which the nervous system of the fish is neutralized, interrupting the nervous flows of the spinal column that stop the degradation process. In this way, it is avoided that the quality of the meat is ruined by the diffusion of toxins that would make the fish sour and not very firm or meaty. Specifically, this technique avoids the waste of adenosine triphosphate, a molecule that allows the natural taste of meat to be preserved. The Ikijime method guarantees, in addition to tastier meat, also greater elasticity and conservation of the same.

MOECHE

WHAT ARE MOECHE

“Moeche” (or Moleche) are nothing more than small crabs from the Venetian lagoon that, in autumn and spring, go through the moulting phase, becoming tender and delicious. Only in these few weeks, Moeches are caught through an ancient process, unique in all of Italy and beyond.

HOW ARE FISHED

The fishing and breeding of Moeche is concentrated between the islands of Giudecca, Chioggia, and Burano, and takes place thanks to the work of the so-called “moecanti”, experienced professionals able to select them in the perfect moulting phase with a technique handed down for centuries from father to son.

1Kg(220/230pcsxKg) SC-022

The preparation of crusted vegetables starts from the grain, carefully selected and ground to give life to flour with exceptional properties. The batter is still handmade and slowly risen to "protect" our vegetables inside a crisp, light and golden crust, giving it an unmatched flavour and fragrance.

UK ORIGINAL BACK BACON

Supplied from a fourth generations of farmers and butchers in the Bakewell area, our bacon is from their own Gloucester Old Spot pigs, a native UK breed. They have outside access to free farrow with little, if any, interference. Renowned for their flavour! Our bacon will come to you vacuum packed and frozen within 24/48 hours from request.
